

System Essentials

\$235.00	EZ-Trap Safety
	Install the EZ Trap with Safety Switch on the primary condensate drain line for the system. The safety switch will be wired into the system to break the 24V Control Circuit. The EZ-Trap can be used for most applications requiring an automatic shutdown protection.
\$237.00	Intermatic Surge Protector
	The surge protector helps protect the most expensive operating equipment in your home from the damaging effects of momentary voltage spikes or other transient power surges.
Starting at \$1,899.00	Water Heater
	Get reliable hot water when you need it with our efficient, affordable, and dependable water heaters. Designed for long-lasting performance and energy savings, they deliver consistent comfort while keeping your utility bills low. A classic solution with modern efficiency — perfect for any home.
\$324.00	Low Level CO Detector
	Keep you and your family safe from poisonous carbon monoxide gas. This detector uses electrochemical sensor technology to detect carbon monoxide.
\$218.00	Wet Switch
	The Wet Switch Flood Detector is a safety device designed to help prevent flooding, damage to carpets, walls, furniture, ceilings, etc. It turns the system off when moisture due to condensate or drain leaks is detected. One or two drops will cause Wet Switch to turn off the system. A lit LED indicates the Wet Switch is activated and has turned the unit off.

System Upgrades

\$94.00	Superboost Hard Start
	Hard start kits integrate with a refrigerant compressor and provide additional energy to help it start and reduce wear from excess power draw. Once the compressor starts, the kit stops boosting the system and allows it to run unassisted.
\$580.00	Ecobee Smart Thermostat
	The Ecobee Smart Thermostat learns your temp preferences and your schedule, so your home is just the way you like it. It automatically lowers the temp when you're sleeping to keep you cool and comfortable.
\$515.00	Condensate Pump w/ Neutralizer
	The NT1-P is ideal for installations that require both condensate removal and neutralization. The condensate produced by gas-fired condensing appliances is acidic and has the potential to harm the environment and the sewer system.
\$1,210.00	Aprilaire 700 Humidifier
	Our fan-powered, duct-mounted humidifier adds balanced humidity to your whole home. The fan pulls air directly from your furnace, moisturizing the air before returning it to the air ducts to be dispersed throughout your home.
\$423.00	Mitsubishi WiFi Adaptor
	Mitsubishi's Kumo Cloud Adapter gives you complete control of your Mitsubishi mini-split systems in the palm of your hand. The Kumo Adapter features set it and forget it programmability, keeping your home comfortable when you are there, and saving you money when you leave.

WHAT WE DO **BEST**

Heating Services

Philadelphia winters bring on new challenges for keeping your home comfortable. But with AirMaster Heating & Cooling Specialists on your side, you'll stay cozy on the coldest days. We know how to keep your heating system operating to prevent a chill from setting into your bones. As a premier service provider for heating in Philadelphia, PA, we work with gas furnaces, boilers, and heat pumps of all makes and models. Trust our team to keep your heating system in great shape, so you can rely on it to work when you need it most.

Air Conditioning Services

Life in Philadelphia without a properly working air conditioner would be uncomfortable, to say the least. You rely on this vital machinery to keep your home cool on muggy summer days and nights. When you call AirMaster Heating & Cooling Specialists to repair your air conditioning in Philadelphia, PA, we will quickly solve your problems.

Indoor Air Safety

Every day you breathe the air inside your home, including the contaminants it contains. At AirMaster Heating & Cooling Specialists, as part of every service visit, our certified HVAC technicians conduct a carbon monoxide (CO) monitoring test to ensure your home is safe from this invisible, odorless, and potentially deadly gas. Our goal is to protect your family's health and safety by identifying potential hazards early and ensuring your HVAC system is running cleanly and efficiently.
